DETAILED ACTION

Allowable Subject Matter

1. Claims 11-30 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art fails to teach or fully suggest an optical circuit comprising: an input for inputting a first input signal at a first wavelength and a second input signal at a second wavelength; an output for outputting an output signal; a first circulator including an input port coupled to the input, an output port coupled to the output, and an intermediate port coupled to a first end of a first selective reflection circuitry the first selective reflection circuit configured to reflect the first input signal and transmit the second input signal; and a second circulator including a first port coupled to a second end of the first selective reflection circuit, a second port coupled to a demultiplexer, and a third port coupled to a multiplexer, wherein the demultiplexer is configured to separate the second input signal into an optical path having an optical switch, the optical switch having a bar mode transmission state that allows the optical switch to transmit the second input signal to the multiplexer and a cross mode transmission state that allows the optical switch to transmit the second input signal to an external output and an additional signal to the multiplexer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
